Report: State needs to boost biotech sector

Silicon Valley / San Jose Business Journal - by [Lisa Sibley](#)

BayBio's plan: Invest in Education

- 1) Invest \$150 million over 10 years in UC-oriented life science incubators State investment of \$150 million over the next 10 years in UC-oriented life science incubators, requiring competitive bids to the state that demonstrate UC-centered public-private partnerships.
- 2) Increase state investment in training centers of excellence Invest \$150 million over the next 10 years in training centers of excellence, requiring competitive bids to the state from the California State University system in public-private partnerships that demonstrate response and flexibility for future response to areas of acute industry need.
- 3) Establish a science fellows program to serve the state government Work with stakeholders to establish a science fellows program throughout the state government to provide objective scientific advice to all branches of the state government.
